A somewhat less than usually informative Stamp Issues Calendar this year from New Zealand Post I am sure you will agree, with no less than four undescribed 'mystery' issues. There could be several reasons for this nondisclosure, for example they may still be in development and not approved yet, but probably the principal one being that NZ Post have simply decided to embargo the issue details until closer to their release dates. However there does not seem to be much point in having a Calendar produced that gives only part of the story!

# New Discoveries

## NZ Second Sideface

From Mr Rod Addison of Tasmania, Australia comes D1b a used copy of a ½d black Second Sideface from 1895, perf 10. The watermark on this printing should be the normal W.4 7mm upright wmk, but Rod spotted that his copy had reversed watermark. This watermark variation is known on the 1897 ½d perf 11 printing D1e(w), but this is the first time rev wmk has been recorded on a perf 10 stamp. So a new discovery! And another CP Catalogue listing:- D1b(w).

Another excellent specialist observation – well done Rod!

## NZ King George V Recess

From Mr Arthur Willis of Sydney, Australia comes another new discovery of another reversed watermark used: this time on the 1916 George V 1/- Official, perf 14x13¼. The normal watermark on this stamp is W.7 upright, and it is also known with inverted watermark W.7c. This is now thus joined by reversed watermark W.7d: KO12a(y). Inverted watermarks are known relatively often in the George V Recess stamps, both ordinary and Official, but reversed watermarks are much scarcer, only existing in the 3d, 4d, and 6d values, and not known in Officials at all. So another very good find!

## NZ King George V Surface

And from Mr John Geary of Dunedin comes K15b a used copy of the 1927 1d Field Marshal perf 14x15, with another watermark error in this stamp. Existing watermark variations known are: K15b(w) reversed watermark with paper correctly surfaced (this to distinguish it from K15c, which is surfaced on the wrong side); K15b(v) 'Z' of 'NZ' missing from watermark; and K15b(t) Star of watermark inverted. John has discovered the companion stamp to K15b(v) – his stamp has the 'N' of 'NZ' missing from watermark. Thus a new CP Catalogue:- K15b(s).

Well spotted John!

Also from Mr Martin McKenzie of Tauranga comes two copies of KO18a the 1917 2d yellow Official. The used one is a further sighting of the Plate 31, R10/18 flaw State (b) consisting of three flaws on the neck and a fourth flaw above George V's moustache, KO18a(z). These flaws only exist on K18a (and on KO18a), the De La Rue paper and developed late in the life of Plate 31, which was not used for any subsequent 2d issue.

In this Official it is not known to exist in Mint condition.

Therefore, Martin's other 2d Official is a great surprise. Not only is this the same Plate 31 R10/18 flaw but it is the previously unrecorded State (a), which is the three flaws on neck but no flaw above moustache, and it is Mint! Thus a new CP Cat. listing:

KO18a(y) Flaw Plate 31, R10/18 State (a) \* –

There's not much that escapes CP clients! An excellent find Martin.

## **Eighty-Five Years Ago**

### **From The New Zealand Stamp Collector – March 1932**

**New Pictorials by Laurie Vernazoni**

Now that the designs of the Dominion's new series of stamps have been made public, the Postal Department will, no doubt, receive a good deal of criticism from those "who know" and others who do not. How much notice of this criticism the Department will take we know not; but we expect the same notice will be taken of the latter class of critic as of the former.

Some of the designs are certainly beautiful and if the subjects are treated by expert engravers we have no doubt that the finished article will be a credit to New Zealand. However, there are one or two of those selected which we shall welcome with apprehension. The 9d stamp looks as though it will be the "black-sheep" of the family. A mass of Maori carving is a difficult subject for reproduction purposes and the "flatness" of this stamp will give the engraver no little trouble. The 6d denomination which depicts a reaper and binder in operation is as typical of Russia as it is of New Zealand.

Whatever the shortcomings of some of the accepted designs we have no doubt that the set will give general satisfaction, but a great deal will depend upon the work of the engravers and the printers. For this reason we trust that the Department will recognize that its responsibility is not over with the acceptance of the designs.

#### **New Zealand New Issues by Ray Collins**

A new printing of the 2d George has recently been made on Wiggins Teape paper in a shade, deep orange, entirely different from the shade of the earlier printing on this particular paper. It is interesting to note that care must be taken in removing the paper from used copies of this latest printing of the 2d value. Whether special ink has been used or whether it is a peculiar property of the paper has not been ascertained but a lengthy immersion in water will result in the back of the stamp becoming distinctly stained and the colour scaling from the surface.

## **Fifty Years Ago**

### **From the CP Newsletter – March 1967**

**New Zealand Notes and Comment by Warwick Paterson**

**POSB Centenary Issue – who died?**

The 1967 POSB Issue has emerged and I am at a loss to know how they got as far as the printers without someone vetoing them. But there they are, an extraordinary combination of the dullest colours and the most unimaginative designs, an unmistakable indication that it has not fully got home to the Post Office yet that good stamps earn revenue at home and funds overseas.

The 9d has a certain austere dignity; the 4d is a frightful stamp, its sombre colours rendering the lettering near unreadable and the whole reminiscent of a poorly-produced bereavement card. Its hideous portraits of both Queens have suffered further by slapdash colour selection. Compare Queen Elizabeth with her portrait on the 1965 4d Parliamentary Conference stamp – yes! it's the same picture but what a difference.

## KING GEORGE VI (cont.)

- 100(p) M14c(y) 1952 1/3d upright wmk "Make-ready" proof issued as stamp. This extraordinary error is a unique variety from a sheet issued at Auckland in October 1952. A proof sheet of just the deep red-chocolate centre-plate had red crayon circles drawn on the sheet by the printer when checking this centre-plate proof, indicating defectively printed areas. In error this proof sheet was later printed with the light blue frame-plate and issued as normal stamps. Examination confirms that the red crayon marks lie under the light blue frame-plate printing. Accompanied by a 1978 Campbell Paterson Ltd letter from Warwick Paterson, authenticating it as the "genuine" "Make Ready Proof" and a further letter regarding the item. Priced on the 2009 revision page as \$1000 – this catalogue price will double to \$2000 the next time Section M is revised..... **\$1500**

# More Modern Errors!

Last month's outstanding major modern errors disappeared like magic! If further confirmation was needed (which it really isn't!), of the strength of the NZ errors & varieties field, there it was. Those fortunate CP clients who acquired their selected error item have added something rather special indeed to their New Zealand stamp collection.

Here is a further small selection - get in quick!

## 1960 Pictorials

538(a) O5a(y) 1960 3d Kowhai vertical pair, top stamp complete missing brown: white branch from brown, and bright lemon-yellow petals; lower stamp normal. Excellent positional pair. **UHM \$400**

## 1970 Pictorials

(b) P2c 1973 1c Red Admiral Butterfly two blocks of four with nice colour shifts: red shifted up; and black shifted down, touching 'ADM' of 'ADMIRAL' and 'TTE' of 'BUTTERFLY' **UHM \$250**

(c) P6c 1973 4c Puriri Moth top right corner Value-block of 15 with good green shift to left, most visible as band of green colour in left margin. **UHM \$220**

(d) P19a 1971 50c Abel Tasman National Park vertical pair with unusual white printing fault on top stamp appearing as a white smudge above 'New' of 'New Zealand'. Interesting **UHM \$200**

## 1982 Map Stamp

539(a) PA35b(x) 1982 24c map lower right corner selvage block of six with good offset of blue sea diagonally across most of corner stamp and small piece second unit. Many offsets are known on other stamps of this definitive series, eg shells and Maori portraits, but this is the first reported on the map stamps. Thus a new CP Cat. listing **UHM \$500**

## Commemoratives

540(a) S102a(z) 1965 Commonwealth Parliamentary Conference 2/- single described as red colour omitted but showing, as is always the case, a faint impression of crossed regalia top left. With an increased CP Cat. UHM of \$4000, this copy LHM **LHM \$2200**

## More Modern Errors (cont.)

- 540(b) S865a(z) 2003 Lord of the Rings III: The Return of the King  
\$1.50 Gandalf the White top selvedge single with major misstrike  
of perforation head, resulting in two extra lines of perfs through  
centre of each stamp. A very visual perf-error. New CP Cat. listing **UHM \$750**
- (c) S865a(z) 2003 LOTR Gandalf perf error as above, this copy top  
left corner selvedge single with perfs through stamp and  
left selvedge **UHM \$800**
- (d) S865a(z) 2003 LOTR Gandalf perf error as above, this time single  
without selvedge and three extra lines of perfs through centre  
of stamp **UHM \$850**

### Christmas

- 541(a) SC2a(y) 1961 2½d Christmas Plate 1A plateblock of six with  
vertical double stamp perfs and horizontal double perfs through  
Harrisons imprint. Lovely plateblock **UHM \$950**
- (b) SC7a(z) 1966 3d Christmas Plate 1A plateblock of six with  
vertical double stamp perfs and horizontal double perfs  
above 1A1A1A1A. **UHM \$950**

### Health

- 542(a) TM36a 1964 Health miniature sheet with two colour shifts: red  
up and blue to the right. This producing a strange looking seagull! **UHM \$275**
- (b) T38a(z) 1966 Health 3d Bellbird lower selvedge plate 1A plate-  
pair complete double perfs, vertically and horizontally.  
A bit fragile! (Cat. \$550) **UHM \$490**
- (c) TM40a(z) 1968 Health Olympics 2½c Miniature Sheet with  
major perf shifts. Known in the 3c miniature sheet, and offered  
in last month's CP Newsletter as lot 537(e), this is a new  
discovery on the 2½c Miniature Sheet: TM40a(z). Vertically we  
now have eight rows of perfs and six rows of perfs horizontally:  
Amazing **UHM \$2000**
- (d) T42a(y) 1970 2½c Netball Health lower right corner selvedge  
block of eight major perforation error, with vertical complete  
double perfs and horizontal perf-misstrike through centre of  
stamps and lower selvedge. Another new CP Cat. listing **UHM \$2000**  
*- if unsold as block of eight, we will consider breaking into  
two blocks of four, one lower selvedge and one lower right  
corner selvedge at* **UHM \$1100 each**
