## New Discoveries

### Government Life Insurance

From Michael Hill, Auckland, comes a good flaw on X9b 1919 1½d orange-brown no VR. This is position R1/11 and consists of a diagonal white stroke through the top right of the 'Z' of 'NZ'.

This is a prominent flaw, which will be listed as X9b(y).

Already known on both the 1½d orange-brown no VR and the 1½d grey-black no VR is the R2/2 long 'T' in 'GOVERNMENT' flaw. So now all that remains is for a R1/11 "long Z" flaw to be discovered on the 1917 1½d grey-black Life Insurance stamp.

### Health

Waterlow & Sons 'Shift Markings' are well known (and most collectable) on the 1935 Pictorials definitives. The markings take the form of a progressive series of dots on either the top selvedge (4d Mitre Peak and 8d Tuatara) or the right selvedge (5d Swordfish and 6d Harvesting). They were intended as an internal indication to Waterlow's as to which Shift had printed any particular sheet.

As noted in the specialised note in the CP Catalogue Section L, these Shift Markings have also been noted in the 1946 Peace 3d, and 1946 and 1947 Health stamps. Shown to us recently by Paul Wales, Blenheim is confirmation of these Waterlow's Shift Markings on the 1d green 1947 Eros Health stamp. This is T19a(y). It is good to actually sight such a variety and thus to confirm its existence.

### Recent Definitives

On 5 June 2019 a \$3.90 scenic definitive was issued. This depicted a spectacular sunset over what is described on the stamp as 'Banks Peninsula, Canterbury'.

From John S Sheppard of Christchurch comes the observation that rather than Banks Peninsula, this stamp actually depicts Akaroa Harbour. "The peninsula in the centre of the harbour is the Onawe Peninsula. The view is looking to the south and is from above the pass over to the harbour from Little River." Well noted John!
